

The Tragedy of Our Wounds

Veterans, active-duty military members, and their families are nearly twice as vulnerable to addiction and compulsive gambling as the general population. We are honored to serve you.

- More than 50% of individuals who have PTSD struggle with addiction.
- 11%-20% of veterans have experienced PTSD.
- Like addiction, PTSD can be successfully treated with long-term care.

About Keystone Treatment Center

Since 1973, Keystone Treatment Center has provided treatment to more than 50,000 clients who have struggled with addiction. Features of our program, which treats active-duty military members, veterans, and their families, include:

- Treatment for addiction, compulsive gambling, & co-occurring disorders
- Specialty tracks for opioid & meth addiction
- Native healing cultural program
- Weekly VSO facilitated group
- Partner with TRICARE West insurance
- VA Community Care Referrals
- Family programming
- All military branches welcome

PTSD & Addiction

Posttraumatic stress disorder (PTSD) is where symptoms of mental illness may occur after a traumatic event. PTSD oftentimes becomes entangled with addiction in the lives of veterans and their families who suffer.

Keystone's addiction treatment philosophy is based upon the belief that challenges with addiction should be addressed as the first step in successful care for PTSD.

PTSD requires a client's long-term investment in clinical support as part of the client's comprehensive discharge plan following completion of treatment at Keystone.

We celebrate all our veterans and will provide our best care for addiction and PTSD.

What to Expect

Clients engage in programming from 7:30AM-8:15PM six days a week, with breaks for meals and time for relaxation and reflection.

Programming includes group sessions, individual counseling, psychological and psychiatric evaluations, education, spiritual development, artistic and creative expression, journal work, step work, and seasonal outdoor fun.

Additionally, we offer a wonderful family program that invites loved ones to become a part of the recovery solution.

Addiction, compulsive gambling, and co-occurring disorders are chronic illnesses and require long-term engagement for authentic recovery success.

How We Help

Since 1973, Keystone Treatment Center has reached out to families in need with professional addiction and compulsive gambling treatment.

We are excited to introduce these services to our veterans, military service members, and their families, and we are proud to now accept TRICARE West insurance and referrals from VA Community Care.

At Keystone Treatment Center, creating a balance of mental, emotional, physical, and spiritual well-being requires us to identify past trauma and introduce the transition from wounded pasts to recovered healing.

You and your family have served our country well. It will be our honor to serve you.
